Power Generation

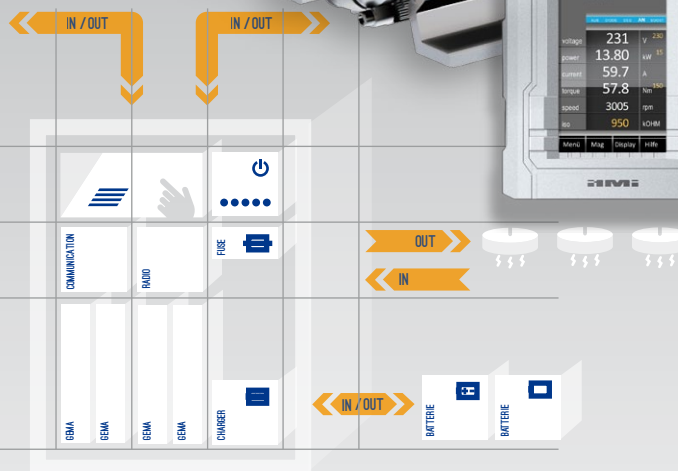

your partner for high-performance generators in industry, construction industry, transportation and military.

KW-Generators. Powerful. Innovative.

We are a young and motivated team of electrical and mechanical engineers.

Our product line comprises generators from 5-550 kVA in the sizes 132, 160, 200, 250 and 355. All generators are synchronous, brushless, suited for application up to IP67 specification and electronically controlled. With CAN interface, insulation monitoring and power control. Measurement of performance and $\cos \varphi$. Display modules, parameter setting software and other accessories for hydraulic drives.

All generators and control devices are developed and produced in-house by KWG. Our products meet the highest standard of quality.

Besides our standard products, we also offer customized solutions. We accompany our customers from the first idea through to series production. In addition, we support our customers in their development of new applications by the supply of 2D and 3D data.
